Newton POWERCHOICE

Beat Brookline! Go 100% green!

Newton is competing with Brookline to have the most people investing in 100% renewable electricity. Help Newton win!

Renewable electricity is generated from sources that we won't run out of, like the sun and wind. Electricity from renewable sources creates cleaner air and helps to combat climate change. Going 100% green is the most effective thing you can do to reduce your carbon footprint.

To choose 100% green and invest in 100% renewable electricity, call 833-272-9592 or visit **newtonpowerchoice.com**

Protect your Eversource account number!

Don't let marketing from private companies confuse you. Many use the words "clean" and "choice." Some will claim to call on behalf of Eversource (which is never true). Some will include large undisclosed fees.

Remember – Look and listen for the name **Newton Power Choice.**

If you don't hear or see Newton Power Choice, you're not signing up for the City program.

With Newton Power Choice, you know you are investing in clean renewable electricity from New England.
